# In-House Products & Innovations

## MEROPET – Veterinary and Social Health Platforms

A SaaS-based digital health solution designed to modernize clinical operations for veterinary hospitals and social health programs.

Core features include:

- Appointment Scheduling: Smart booking system with SMS/email reminders and calendar sync.
- Treatment & Case Management: Maintain detailed health records, prescriptions, lab results, and vaccination history.
- Client and Pet Registration: Centralized database with owner and animal profiles.
- Analytics & Reporting: Custom reports for clinic performance, medicine usage, and disease trends.
- Multi-Clinic Deployment: Currently in active use by several veterinary clinics across Nepal, allowing scalable access to data and care delivery tools.

---

## Learning Management System (LMS)

A robust in-house developed platform designed to enhance corporate training and workforce development.

Key capabilities include:

- **Employee Onboarding & Course Management:** Organize and deliver training modules, videos, and quizzes to employees.
- **Productivity & Skill Tracking:** Monitor staff progress, module completion rates, and knowledge gaps.
- **Performance Evaluation Tools:** Assess performance using tests, assignments, and scoring rubrics.
- **Multi-Tenant Architecture:** Easily supports multiple companies or departments under a single SaaS infrastructure.
- **Used by Multiple Clients:** Actively deployed by private institutions for consistent employee upskilling and HR training operations.

---

## **AI-Powered NEPSE Trading Assistance**

An advanced AI-driven analytics platform tailored specifically for the Nepal Stock Exchange (NEPSE) market.

Key features include:

- **AI-Based Technical Analysis:** Provides chart pattern recognition, momentum tracking, and trend forecasting using AI algorithms.
- **Beginner-Friendly Portfolio Guidance:** Helps new traders make informed decisions with automated insights and educational hints.
- **Trade Recommendations & Sentiment Analysis:** Monitors market sentiment from news, forums, and historical behavior to generate buy/sell signals.
- **Algorithmic Research Tools:** Integrates a research-based engine for back-testing NEPSE indicators and simplifying algo-trading for Nepal's regulatory environment.
- **Built-In Education:** Interactive tutorials and progress tracking to empower first-time investors and grow market literacy.

# Industry-Specific Experience

We've successfully worked in sectors including:

- **Automobile Spare Parts eCommerce**
  - Scalable platforms for multi-brand car parts sales and inventory management, integrating search, categorization, and logistics support.
- **Accounting & Inventory Systems**
  - Simplified and robust accounting and inventory solutions for SMEs.
- **Media & Entertainment**
  - Digital asset management platforms for music and video distribution.
- **Bus Ticketing Platform**
  - End-to-end digital solutions for bus companies, including seat booking, route planning, mobile ticketing, real-time tracking, and payment gateway integration for nationwide scalability.
- **Vehicle Queue + Weighbridge Integration System**
  - Developed custom hardware-software integration to synchronize vehicle queues with weighbridge machines, streamlining logistics operations.
- **Government & Private Sector Websites**
  - Multilingual, mobile-responsive websites designed for high engagement and accessibility.
